

PI 565300. *Scirpus californicus* (C. A. Meyer) Steud. CYPERACEAE  
California bulrush

**Donated by:** Owsley, C.M., USDA-SCS, Americus Plant Materials Center, 295 Morris Drive, Americus, Georgia 31709, United States. **remarks:** Received through National Plant Materials Center, USDA-SCS, B-509, BARC-East, Beltsville, MD 20705. Received February 18, 1993.

**donor id:** 9062617. **origin:** United States. **collector:** O. Bundy. **other id:** SCCA. **locality:** Isolated wetland near Hillsborough river floodplain, near I-4, near Brandon, Florida, 15 miles E of Tampa, Eastern Hillsborough Co., Florida. **remarks:** Selected from comparative evaluation of material in constructed wetland including *Typha latifolia*, *Scirpus validus*, *Zizaniopsis miliacea* and *Panicum hemitomon*. Propagated by direct increase of vegetative material. A coarse robust and gregarious bulrush from tight sub- rhizomatous knots. Usually from 9 feet tall in plantings. Stems stout, obtusely 3-angled. Leaves few, basil. 50-150 spikelets. Anticipated use constructed wetland systems of southeastern U.S. Perennial. Cultivated. Plant.

PI 565301. *Hemerocallis fulva* (L.) L. LILIACEAE Daylily

**Donated by:** Owsley, C.M., USDA-SCS, Americus Plant Materials Center, 295 Morris Drive, Americus, Georgia 31709, United States. **remarks:** Received through National Plant Materials Center, USDA-SCS, B-509, BARC-East, Beltsville, MD 20705. Received February 18, 1993.

**origin:** United States. **pedigree:** Selection from composite of 9019880/9019881. **other id:** HEFU. **remarks:** Selected by comparative evaluation from broad based collection in 1960's-1970's. Selected for attractive and vigorous blooms. Differs from most daylilies by displaying bright orange floral parts. Increased by direct vegetative propagation. Glabrous, herbaceous scapose, stoloniferous. Leaves linear, 3-6 decimeters long, 1.5cm wide, erect 5.5dm to 9dm tall, with 1-2 bracteal leaves near the summit, forked into 2 bracteate racemes. Pedicels 5-21mm long, flowers perfect, Perianth orange up to 10-12cm across, fruit fails to develop. Roadside and const. wetland beautification. Cultivated. Plant.

PI 565302. *Zizaniopsis miliacea* (Michx.) Doell & Aschers. POACEAE  
Giant cutgrass

**Donated by:** Owsley, C.M., USDA-SCS, Americus Plant Materials Center, 295 Morris Drive, Americus, Georgia 31709, United States. **remarks:** Received through National Plant Materials Center, USDA-SCS, B-509, BARC-East, Beltsville, MD 20705. Received February 18, 1993.
